Infected Ear is based on the music we play on repeat.

Everybody must have been pushed that 'repeat' button once in a while. It is convenient. It is fun. It is filling. On this website, we are trying to let the story tellers tell their stories in details. It is proudly designed around our [artistic] obsessions. Enjoy it.

ONE-QUESTION INTERVIEWS: FEED THE [LOOP] MONSTER

First things first:

Sound waves travel into the ear canal until they reach the eardrum. The eardrum passes the vibrations through the middle ear bones or ossicles into the inner ear. The inner ear is shaped like a snail and is also called the cochlea. Inside the cochlea, there are thousands of tiny hair cells.

Second things second:

obsession

noun

the domination of one's thoughts or feelings by a persistent idea, image, desire, etc.

Third things third:

"Obsessive love disorder" (OLD) refers to a condition where you become obsessed with one person (in our case; a song, or any piece of art) you think you may be in love with.

Wtf are we talking about?

Pretty simple. Sound waves> Ears> Obsession> OLD> Play on repeat.

This is the world of loopers. This is a useful kind of ear infection. Have you got an infected ear? Help spread it.
